

Press Release

AI phishing simulation and training from Cyberdiserose Security Awareness takes off

Just in time for the Swiss Cyber Security Days, Cyberdiserose Awareness Solutions is presenting new functionality to make it even easier to carry out efficient, individual phishing and smishing exercises. The Swiss start-up wins its first customers in Switzerland and the EU.

Zug/Switzerland, 15th of February 2024 – The Swiss company Cyberdiserose AG, a provider of AI-enabled simulation software and training in the field of cybersecurity awareness, will be presenting the latest features of the Cyberdiserose Awareness Appliance at the SCSD in Bern..

Cyberdiserose makes companies more secure

Cyberdiserose enables companies to develop, measure and improve the security awareness of their employees. Strengthen a "human firewall" with simulated attacks and use the Cyberdiserose e-learning platform. Benefit further from the cybersecurity chatbot and preconfigured, customizable videos, trainings, and quizzes. The fully multi-client capable platform can even be operated locally or in your own cloud.

Cyberdiserose and the Cybersecurity Days

The Swiss Cybersecurity Days (SCSD) will take place from February 20-21, 2024 at the BERNEXPO area. Cyberdiserose will be presenting the brand-new version 1.6 of the cybersecurity awareness solution at stand S06 in hall 2.2. - <https://scsd.ch/en>

New Features at a glance

Version 1.6 of Cyberdiserose now makes it possible to use AI to create individual spear phishing messages and send them to employees. Smishing simulations can now also be sent to employees' mobile numbers via SMS. This version also introduces the separate multi-client capability of the software, a key functionality for larger companies or security service providers.

Expansion of sales activities to Europe

After just 6 months, the young Swiss company has already been able to expand its sales activities to France, Italy, Germany, and the USA. Boll-Engineering has been appointed as distributor for sales in the DACH region. Competent partners are currently being sought for the distribution network.

Palo Stacho, founder of Cyberdiserose AG: "AI has made real attacks smarter and much more efficient - with Cyberdiserose, we are responding to this new challenge. Our simulations reflect this new reality, which no company should turn a blind eye to."

About Cyberdiserose

Cyberdiserose was launched in 2023 by a group of founders in the cybersecurity awareness industry to bring better cybersecurity awareness training and testing solutions to the market. Cyberdiserose is a comprehensive, AI-powered platform and software that can be used to sustainably train and test an organization's employees against cyber risks. The company is
